Sasol building Johannesburg

Protea Place - Johannesburg

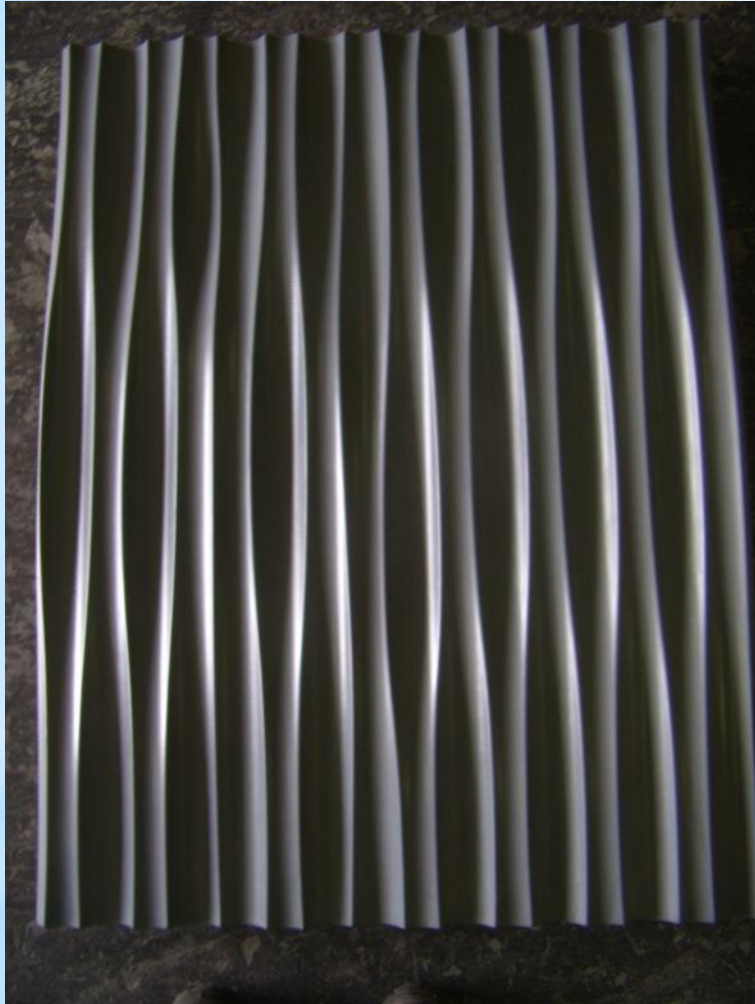

Unique Customer Requirement:

- The Cladding system had to create movement and mood at different times of the day.
- A1 with Zinc gelcoat with a wave type design was chosen
- This was achieved by adding 80% Zinc filler and slightly polished then sealed with A1 sealer.
- Protea place was uniquely built. The exterior A1 panels and glass was erected and then the internals were done.
- Building is 6 years old
